

Rollit - Profile Bars, Triangular & Square Frames

Use Rollit profile bars and telescopic corner struts to stretch your banners and make a free-standing display system. The height of the telescopic struts can be varied from 95 cm to 225 cm and up to 300 cm using an adapter. The system is available as complete kits for square or triangular frames. Standard sizes are 50 and 90 cm. The profile bars can also be ordered cut to other lengths to give you a triangular or square frame of the size you need. Comes in a protective woven slip-over bag.
